Summary

Frontend Engineer with 2.5+ years of experience building scalable, high-performance web applications using Angular, TypeScript and modern JavaScript (ES6+). Recognized at Accenture for engineering modular Angular UI systems, cutting frontend delivery cycles, and optimizing Core Web Vitals.

Skills

Frontend	Angular (v15-21+), TypeScript, JavaScript (ES6+), RxJS, HTML5, CSS3, Web Performance Optimization
Tools	Git, Karma, Chrome DevTools, npm Security Auditing, GitHub Copilot

Experience

Accenture Inc. *April 2024 – Present*
Full Stack Developer (SDE) — Angular & Enterprise Web Platforms *Pune, India*

- Architect and maintain modular enterprise web applications using Angular and TypeScript, consuming REST APIs from .NET and Node.js microservices.
- Engineered a reusable 30+ pattern Angular UI component toolkit, standardizing design consistency and cutting frontend feature turnaround time by 35% across engineering pods.
- Eliminated critical authentication and routing edge cases, resolving complex Angular permission-guard redirect defects across development and production environments.
- Decreased npm security vulnerabilities by 100% (from 14 to 0) via dependency audits, while integrating i18next localization and AI-assisted workflows (GitHub Copilot).

WNS Ltd. *April 2023 – August 2023*
Associate — Technical Support (L2, Junior) *Pune, India*

- Provided Level 2 technical support, troubleshooting and resolving escalated issues beyond initial front-line support.
- Diagnosed technical problems via phone, email, and chat channels while maintaining SLA compliance in a high-volume support environment.

Projects

MTSE — Multi-Tenant Store Engine *2024*
TypeScript, JavaScript (ES6+), React.js, Vite *Production Side Project*

- Built an enterprise multi-tenant e-commerce platform featuring a high-speed TypeScript storefront and admin console.
- Created a shared TypeScript core library for unified API communication, validation schemas, and routing, reducing cross-app boilerplate code by 40%.
- Achieved 85%+ test coverage using Vitest and React Testing Library.

Responsive E-Commerce Platforms *2023 – 2024*
JavaScript (ES6+), HTML5, CSS3, REST APIs *Freelance*

- Shipped mobile-first e-commerce web applications featuring dynamic product catalogs, seamless cart workflows, and secure payment integrations.
- Optimized rendering cycles, lazy loading, and asset compression pipelines in JavaScript, achieving 95+ Lighthouse performance scores.

Education

PVG College of Engineering, Nashik (University of Pune) *Graduated 2022*
Bachelor of Engineering (B.E.) in Information Technology *Distinction with First Class*
